ABOUTME

- **DevOps Engineer with hands-on experience** in cloud computing, automation, and CI/CD pipelines, gained through multiple internships and real-time projects.
- Proficient in **scripting with Bash** and managing Linux-based environments to automate routine tasks and improve system reliability.
- Skilled in implementing **CI/CD pipelines** using tools like **Jenkins, GitHub, Docker, and Kubernetes** to enable faster and more reliable software delivery.
- Practical knowledge of **Infrastructure as Code (IaC)** using **Terraform and Ansible** to provision, configure, and manage infrastructure efficiently.
- Strong experience in **AWS Cloud Services**, including **EC2, VPC, S3, IAM, RDS, CloudWatch, Route 53, Auto Scaling, Load Balancer, and Elastic Beanstalk**.
- Developed and deployed full-stack applications using the **MERN stack (MongoDB, Express, React, Node.js)** with real-time integration into CI/CD workflows.
- Capable of identifying performance bottlenecks and streamlining DevOps workflows to **enhance system performance, security, and scalability**.
- Adept at **collaborating in cross-functional teams**, mentoring peers, and contributing to documentation and knowledge sharing across the development lifecycle.
- Always eager to learn and adopt new technologies, with a strong focus on delivering value through automation and efficient DevOps practices.
